Memorandum for the Record

29 July 1976

[REDACTED]
C/CSB, PSTD/SI

Telecon with Mr. Herman Pollock, OTA

1. Mr. Herman Pollock, OTA project leader for the study on Technology and World Trade, called on 28 July to say they were about to proceed on one part of the four-part effort. The OECD countries would be the first group to be investigated.

2. Mr. Pollock asked that any recent studies completed in the areas of technology transfer or strategies and industrial technologies be made available, classification permitting. As the result of an earlier discussion on this subject we forwarded him a copy of a technology transfer study, Methodology for Analyzing International Technology Transfer. Three new studies, Foreign National Science Policies and Technology Strategies, The General Purpose Computer Industry of Western Europe and Japan: Prospects to 1985, and The Minicomputer and Microprocessor Industry of Western Europe and Japan: Prospects to 1985, are being forwarded through OLC.

3. Mr. Pollock also recalled that we had mentioned during our earlier discussion the name(s) of retired Agency employee(s) who might be available as a consultant for the East-West trade portion of his study. As I recall, [REDACTED] name was mentioned by either myself or [REDACTED] OER, in this context. I gave [REDACTED] home telephone number to Mr. Pollock.

4. Mr. Pollock said he would be in touch with us as his effort gets underway.

Distribution:

Orig - Record
1 - OLC (Attn [REDACTED])
1 - EA/DDS&T
1 - D/SI
1 - C/PSTD
